4. First-aid measures	
Description of first aid measu	
General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin Contact	Remove affected person from source of contamination. Rinse immediately with plenty of water.
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.
Most important symptoms an	d effects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin contact	Prolonged contact may cause dryness of the skin.

Eye contact	May cause temporary eye irritation.						
Indication of immediate medic	al attention and special treatment needed						
Notes for the doctor	Treat symptomatically.						
Specific treatments	No special treatment required.						
5. Fire-fighting measures							
Extinguishing media							
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.						
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.						
Special hazards arising from the	he substance or mixture						
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up. Contains Hydrocarbons. The product is immiscible with water and will spread on the water surface.						
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.						
Advice for firefighters							
Protective actions during firefighting	Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak.						
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable.						
6. Accidental release measure	S						
Personal precautions, protecti	ve equipment and emergency procedures						
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Use protective equipment appropriate for surrounding materials.						
Environmental precautions							
Environmental precautions	Avoid discharge to the aquatic environment.						
Methods and material for cont	ainment and cleaning up						
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of contents/container in accordance with national regulations.						
Reference to other sections	For personal protection, see Section 8. For waste disposal, see Section 13.						

7. Handling and storage							
Precautions for safe hand	ling						
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Avoid contact with used product. Do not reuse empty containers.						
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.						
Conditions for safe storage	e, including any incompatibilities						
Storage precautions	Store away from incompatible materials (see Section 10). Keep container tightly closed, in a cool, well ventilated place. Protect containers from damage.						
Storage class	Chemical storage.						
Specific end uses(s)							
Specific end use(s)	The identified uses for this product are detailed in Section 1.						
8. Exposure Controls/pers	onal protection						

#### **Control parameters**

#### Occupational exposure limits

Comments

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

Under conditions which may generate mists, the following exposure limits are recommended: Long-term exposure limit (8-hour TWA): 5 mg/m<sup>3</sup> Short-term exposure limit (15-minute): 10 mg/m<sup>3</sup>

#### Citral

Long-term exposure limit (8-hour TWA): ACGIH 5 ppm 32 mg/m<sup>3</sup> inhalable fraction and vapor A4, DSens, Sk

#### Pin-2(10)-ene

Long-term exposure limit (8-hour TWA): ACGIH 20 ppm 112 mg/m<sup>3</sup> A4, DSens

#### 2,6-Di-tert-butyl-p-cresol

Long-term exposure limit (8-hour TWA): ACGIH 2 mg/m<sup>3</sup> inhalable fraction and vapor A4 ACGIH = American Conference of Governmental Industrial Hygienists. A4 = Not Classifiable as a Human Carcinogen. DSens = Dermal sensitizer. Sk = Danger of cutaneous absorption.

#### Exposure controls

Appropriate engineering	Provide adequate ventilation. Good general ventilation should be adequate to control worker
controls	exposure to airborne contaminants.

Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. The following protection should be worn: Chemical splash goggles.								
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.								
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.								
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.								
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.								
Environmental exposure controls	Not regarded as dangerous for the environment.

Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.							
Possibility of hazardous reactions	No potentially hazardous reactions known.							
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.							
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a nazardous situation.							
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.							
11. Toxicological information								
Information on toxicological ef	fects							
Toxicological effects	Not regarded as a health hazard under current legislation.							
Acute toxicity - oral Notes (oral LD₅o)	Based on available data the classification criteria are not met.							
Acute toxicity - dermal Notes (dermal LD <sub>50</sub> )	Based on available data the classification criteria are not met.

Specific target organ tox STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.				
•					
	xicity - repeated exposure				
STOT - repeated exposi	<b>ure</b> Not classified as a specific target organ toxicant after repeated exposure.				
Aspiration hazard					
Aspiration hazard	Based on available data the classification criteria are not met.				
General information	No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.				
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.				
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may				
	be inhaled, resulting in the same symptoms as inhalation.				
Skin Contact	Prolonged contact may cause dryness of the skin.				
Eye contact	May cause temporary eye irritation.				
Route of exposure	Ingestion Inhalation Skin and/or eye contact				
Target Organs	No specific target organs known.				
Medical considerations	Skin disorders and allergies.				
Toxicological information	n on ingredients.

13. Disposal considerations							
Waste treatment methods							
General information	The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.						
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.						
14. Transport information
